

Ghislain Brault-Joubert, FCAS

Analytics professional & Actuary
ghislain@ghbrj.ca | Montreal, QC | 514-726-0359

Everyday I strive for superior, influential decision-making with data. I collaborate with business leaders to identify, prioritize issues and deliver useful data solutions through my work and teams.

I would love to contribute and keep perfecting my craft as an analytics leader or senior data analyst by tackling novel, challenging business problems within and beyond the insurance industry.

My work philosophy is deeply customer and problem-centric: *Useful* and *sufficient* solutions to the *right* business issues to advance the objectives of the organization.

Experience

Sr. Manager¹, Claims Analytics

Co-operators General Insurance Co. | Montreal, QC

January 2020 — Present

Settling claims is the promise made to ~1M policyholders when unfortunate events happen. The claims function pays out roughly \$2B per year and has a workforce of ~1600 employees reporting up to 8-10 Assistant Vice-Presidents (AVPs). Tremendous opportunities to improve client, employee outcomes and reduce costs in an environment where the data maturity is low but developing.

The analytics function within Claims needed to grow because of a rapid, significant increase in demand and expectations from business partners for decision-making with data. In this growth phase, it was important to create and maintain a supportive environment to ensure wellbeing of our team of ~30 professionals while delivering valuable and high quality work.

Claims business partners needing analytics solutions to drive better decision-making

- Acted as a *strategic leader* with business partners to facilitate the elicitation of business problems, identify and prioritize data initiatives and oversee execution by analytics delivery teams.
- Dealt with business problems ranging from *workforce management, operational performance management, process improvement* such as work segmentation & assignment, *quality assurance & risk control* and management of *vendor relationships and performance*. Through my teams, I solve these problems using data analysis, modeling and visualizations (reports, dashboards).

Skills: *Strategic & Tactical Planning | Problem Solving | Metric Definition | Data Analysis | Data Visualization | Machine Learning Technology: Virtual tools (Teams, Miro) | R | SQL | Jira | Confluence | Git | Guidewire Claim Center*

Analytics professionals needing strong leadership and a supportive environment to thrive

- Acted as *people leader*, defined team mandates, roles & responsibilities and performance expectations; Hired 15+ analytics professionals; Evaluated & rewarded achievement of goals; Influenced & implemented structure and role changes.
- Acted as *practice leader*, defined and negotiated operating and service models with Claims and other partners; Defined related workflows (intake, prioritization, execution) and integrated more agile delivery principles; Built and implemented change management plans.
- Acted as *technical supervisor*, provided support and coaching on technical matters; Accompanied team members in their career development.

Skills: *People Leadership | Performance Management | Process Improvement | Negotiation | Change Management*

Actuarial Manager² & Expert

Co-operators General Insurance Co. | Montreal, QC

May 2014 — January 2020

Driving profitable growth of commercial risks through pricing initiatives

- Led all aspects of actuarial work for a portfolio of commercial risks worth ~\$300M in annual premium. Delivered rate indications, segmentation analyses and related system implementations. Designed and implemented new rating algorithms and a risk selection framework.
- Acted as people leader; oversaw the professional and personal wellbeing of about 6-8 team members, set goals & evaluated performance.
- Acted as technical supervisor, providing support and coaching on technical matters; Accompanied team members in their career development.

Actuarial Consultant

Intact Financial Corp. & AXA Canada | Vancouver, BC

August 2009 — April 2014

Led Commercial Lines pricing assignments in Western Canada. Business lines included commercial automobile rate filings, small businesses, mid-market commercial, large accounts, specialty lines (E&O, D&O) and earthquake coverage
